

OPAC-018 Green-Schur Bridge

Clean referee package v2.0.0

Author: Shawn Calvin Snelling / Axezent AI Research Lab

Status: SOLUTION-CANDIDATE / EXTERNAL REVIEW PENDING

Includes exact Python audits, counterexample stress tests, SHA-256 receipts, proof-risk documentation, diagrams, charts, and a GitHub Pages-ready website.

Core computational target: verify documented rational block families stay below the $\kappa < 2$ boundary under exact arithmetic.

This PDF is a compact package summary. See [paper/main.tex](#) for manuscript source.
